

*Ephemerides*

GREAT  
News from the Stars  
OR, AN  
EPHEMERIS  
For the YEAR, 1706.

WITH  
*Observations upon the Eclipses, Solar  
Ingresses and Configurations of Heaven,  
happening therein.*

*Being the Second from the Bissextile, or  
Leap-Year.*

And from the Creation of the WORLD  
according to the best of *History*, 5655 Years.

WHEREIN

You have an *Account* of many things about the  
*Heavenly Bodies*, and their *Portents* in the  
same YEAR, with some other *Considerable  
Matters.*

By WILLIAM ANDREWS, Student  
in *Astrology.*

*Cæli enarrant gloriam Dei.*

LONDON,

Printed by *J. Wilde*, for the Company of  
STATIONERS, 1706.

# To the Reader.

**N**otwithstanding my Age, I do here come again unto you once more : The good Hand of Almighty God having enabled me to write of the Year, 1706, a coming on.

As to the Three visible Eclipses in this Year, in our Horizon, with the Proceedings, Positions, and Configurations of the Stars therein, and their Effects, you have them Astrologically considered herein. However, we must express our Apprehensions of the Greatness of Almighty God, in all Great Mundane Accidents whatsoever ; for he doth according to his Will in the Army of Heaven, and among the Inhabitants of the Earth, and all the Inhabitants of the Earth are reputed as nothing ; and none can stay his Hand, or say unto him, what doest thou ? — His Dominion is an everlasting Dominion, and his Kingdom is from Generation to Generation. — Dan. 4. 34, 35. He removeth Mountains, and overturneth them in his Anger. — He shaketh the Earth out of her Place, and the Pillars thereof tremble. — He doth great things past finding out ; yea, and wonders without number, Job 9. 5, 6. 10.

When the Blessed Millennium, so much expected by many, shall appear, (which, as some think, is not far off :) Peace will be Universally in the World, (as some conceive) and all Tranquility.

WILLIAM ANDREWS.

A perpetual TABLE of break of Day, Twilight, Length of the day & night, & the Increase and Decrease of the days.

|             | 21    | 6             | 58 | 6              | 2  | 7                  | 44 | 16                   | 16 | 10                    | 10 |

Days Increased.

Days Decreased.

This TABLE shews you the Time when the Day breaks, and when the Twilight ends, after the going down of the Sun; and the Length of the Day and Night, and how much the days are increased, or decreased, on the 11th. and 21st. day, of every Month, throughout the year, for ever; in the Latitude of 51 Degrees, and 32 Minutes.

# Notæ Vulgares:

O R,

Common Notes for this present Year, 1706.  
according to both Accounts, viz.

| Julian | and                  | Gregorian. |
|--------|----------------------|------------|
| 16     | The Golden Number.   | 16         |
| 7      | Cycle of the Sun.    | 7          |
| A      | Dominical Letters.   | C          |
| 14     | Roman Indiction.     | 14         |
| 26     | Epact.               | 15         |
| 3      | Number of Direction. | 6          |

## The Use of the Two ensuing Tyde-Tables.

**T**O find the time of Full Sea, or High Water in any of those Places mentioned in the two ensuing Tyde-Tables, you must observe, First, the Age of the Moon, which you may easily find in the next following Table, wherein you have the Moon's Age every day throughout this year, 1705. and having therein found out the Moon's Age, according to those Directions mentioned for that purpose in the side of the said Table; then have recourse unto the said Tyde-Tables, & look for the place desir'd in the Head of the said Tables, with the Age of the Moon, in the Column under the Title of the Moon's Age, and in the Common Angle or meeting of these Lines in the Column under your Place, you shall have the time of High-Water and Full Tyde in hours and minutes.

Yet Note, That the Tydes do not fall out exactly at the time found in these Tables, by reason of the Difference of the Moon's Latitude, High Winds, Land-Floods, &c which do very often alter the Time; but this is the Common Rule, generally given, for the finding of them.

A Table of the Moon's Age, every day throughout this Year, 1706. whereby, with the help of the ensuing Tyde-Tables, the time of High-water and full Tyde may be found in those Places there inserted.

| Days. | January. | February. | March. | April. | May. | June. | July. | August. | September. | October. | November. | December. |

# January's Planetary Transactions, and Observations, 1706.

The { 1 day, at 1 in the morning, *Mars*  
 { 2 day, at 1 in the morning, *Venus*  
 { 3 day, at 1 in the morning, *Mercury*.  
 { 11 day, at 10 before noon, *Saturn* } is with the D.  
 { 16 day, at 3 after noon, *Jupiter*  
 { 29 day, at midnight, *Mars*  
 { 31 day, at noon, *Mercury* }

*Saturn* and *Jupiter* are now *Occidental* and *Evening-Stars*; and *Mercury* to the 15th. day, and then He becomes *Oriental* and a *Morning-Star*: *Mars* and *Venus* are *Oriental*, and *Morning-Stars* now.

**S** *Aturn* is now in *Taurus*, and becomes direct in Motion: *Jupiter* is in *Cancer* Retrograde: *Mars* is in *Sagittary*, and goes now from thence into *Capricorn*: *Venus* passeth thro' *Capricorn* into *Aquarius*; and *Mercury* being there Retrograde, goes back into *Capricorn*, and there becomes direct in Motion. There is now an *Opposition* of the *Sun* and *Jupiter*, and of *Jupiter* and *Venus* in *Cancer* and *Capricorn*: A *Trine Aspect* of *Saturn* and *Venus* in *Taurus* and *Capricorn*; a *Conjunction* of the *Sun* and *Mercury* in *Aquarius*: and a *Quartile Aspect* of the *Sun* and *Saturn* in *Taurus* and *Aquarius*.—*Poland*, and some Northern Countries, may be now much concerned, as well as some Southern. Many Discourses about the present Negotiations of some Foreign Nations; whose publick Affairs may be in some uncertain Circumstances. Some Countries may be for War, others for Peace, and may be inclinable to promote it—

Cold, Snowy, or Wet Weather often in this Month, with some High Winds.

February

New Moon the 2d. day, about 6 in the morning.

First Quarter the 8th. day, near 11 at night.

Full Moon the 16th. day, 46 minutes past 2 afternoon.

Last Quarter the 24th. day, near 7 at night.

## February's Planetary Transactions, and Observations, 1706.

The { 1 day, at 4 in the morning, *Venus*  
 7 day, at 6 at night, *Saturn*,  
 12 day, at 5 at night, *Jupiter*  
 17 day, at 11 night, *Mars*, } is with the ☽.

*Saturn* and *Jupiter*, are Occidental and Evening-Stars all this Month: *Mars*, *Venus*, and *Mercury*, are Oriental and Morning-Stars.

THE Three Superiour Planets, viz. *Saturn*, *Jupiter*, and *Mars*, continue in the same Signs mentioned in January past: But *Venus* removes from *Aquarius* into *Pisces*, and *Mercury* from *Capricorn* into *Aquarius* at this time. The Configurations of the Stars in this Month are these, viz. a Quartile of *Saturn* and *Venus*, and *Saturn* and *Mercury* in *Taurus* and *Aquarius*: a Trine of *Saturn* and *Mars* in *Taurus* and *Capricorn*; an Opposition of *Jupiter* and *Mars*, in *Cancer* and *Capricorn*: a Sextile of the Sun and *Saturn*, in *Pisces* and *Taurus*: And at the Month's end, a Trine of the Sun and *Jupiter*, in *Cancer* and *Pisces*.—Various News from some Neighbouring Countries. Debates and Controversies about future Martial Proceedings. Some Nations dissatisfied. Differences in some Places about Religious Matters, and some other Things of Consequence. Some Doings of Importance where Armies are. Military Preparations for Sea and Land in divers Countries. Inconveniences in some Maritime Affairs. Some Action at Sea; Reports from thence, and from the North, and South Parts of the World.

Much Wet or Sleety, Cold, Stormy, and unsettled Weather in this Month; and some Claps of Thunder in some Places also.

March's

1706.

## March hath xxxi Days:

New Moon the 3d. day, 26 minutes past 4 afternoon.  
 First Quarter the 10th. day, about 9 in the morning.  
 Full Moon the 18th. day, 17 minutes past 8 in the morn.  
 Last Quarter the 26th. day, 29 min. past 8 in the morn.

## March's Planetary Transactions, and Observations, 1706.

The { 2 day, at 7 in the morning, *Mercury*  
 { 3 day, at 3 in the morning, *Venus*  
 { 7 day, at 5 in the morning, *Saturn* } is with the ☽.  
 { 11 day, at 9 at night, *Jupiter*  
 { 28 day, at 9 at night, *Mars*

*Saturn* and *Jupiter* are still *Occidental* and *Evening-Stars*; and *Mars* and *Venus* are *Oriental* and *Morning-Stars*, and so is *Mercury* to the 26th day; and then He becomes *Occidental* and an *Evening-Star*.

**M**ars is now come into *Aquarius*, but *Saturn* and *Jupiter* are in the same Signs still, as in the Two other Months past. *Jupiter* now becomes direct in Motion: *Venus* and *Mercury* remove from *Pisces* and *Aries*, and the Sun comes thither about One of the Clock in the Morning, on the 9th. Day of this Month. There is in this Month a Sexile Aspect of *Saturn* and *Venus*, and *Saturn* and *Mercury* in *Taurus* and *Pisces*; and of *Mars* and *Mercury* in *Aries* and *Aquarius*: A Trine of *Jupiter* and *Venus*, and *Jupiter* and *Mercury* in *Cancer* and *Pisces*: A Conjunction of the Sun and *Mercury*, and of *Venus* and *Mercury* in *Aries*: A Quartile of *Saturn* and *Mars* in *Taurus* and *Aquarius*; of *Jupiter* and *Mercury*, the Sun and *Jupiter*, and (at the Month's end) of *Jupiter* and *Venus* in *Aries* and *Cancer*. — Considerable Transactions draw nigh in some Countries beyond the Seas; and Martial Undertakings: Many disagreeing Configurations of the Stars do now appear; whole Effects will now, or sometime hereafter be manifested in the North, North-East, and Eastern Parts of the World. Some Alterations may now happen in the Leagues and Confederacies of some Nations.

Moderate Weather in this Month, till towards the latter-end, and then many Showers of Hail and Rain, with Winds and Thunder, &c. will happen in many Places.

April's

1706.

April hath xxx Days.

New Moon the 1st. day, 44 minutes past midnight.

First Quarter the 8th. day, about 10 at night.

Full Moon the 17th. day, about 1 in the morning.

Last Quarter the 24th. day, 30 minutes past 6 at night.

# April's Planetary Transactions, and Observations, 1706.

{ 1 day, at midnight, *Venus*  
 { 2 day, at 4 after noon, *Mercury*  
 { 3 day, at 8 at night, *Saturn*  
 { 8 day, at 7 in the morning, *Jupiter*  
 { 26 day, at 6 after noon, *Mars*

is with the ☽.

*Saturn, Jupiter, Venus, and Mercury* are now *Occidental*; and *Evening-Stars*: *Mars* is *Oriental*, and a *Morning-Star* still.

Type of the Moon's  
eclipse in this Month.

ON Wednesday the 17th. day of this Month, about One of the Clock, in the Morning, the Moon will be about Five Dig-  
its Eclipsed in the 7th. Degree of *Scorpio*: Which Eclipse may be seen here (if the Air favour us.) 'Twill begin a little after midnight, the greatest Obscuration thereof, will be about a Quarter of an Hour after One of the Clock in the Morn-

ing, and the end will be about half an hour after 2.—The  
Moon's Duration will be about Two Hours and an half.—

*Mars* comes now into *Pisces*, *Venus* into *Taurus*, and *Mercury*  
so comes thither, and from thence into *Gemini*: And now  
the Sun and *Venus* are in *Conjunction* in *Aries*, and *Saturn* and  
*Mercury*, and *Saturn* and *Venus* in *Taurus*: And there is now  
Sextile Aspect of *Mars* and *Venus*, and the Sun and *Mars* in  
*Aries* and *Aquarius*; and of *Jupiter* and *Mercury*, and *Jupiter*  
and *Venus* in *Taurus* and *Cancer*.—Martial Actions now.

Matters of Eminent Concernments on Foot in divers Places  
Europe: Those that are under *Aries* and *Cancer*, may be  
now in some kind or other, sensible of the Portents of the  
Stars.—Some Difficulties and Divisions may unexpectedly  
appear Northward and North-East.—

Unconstant Weather; Cold and Hasty Storms often in this  
Month; if not much Rain, or some Snow at the end, &c.

May's

1706.

May hath xxxi Days.

New Moon the 1st. day, 31 minutes past 9 in the morn.

First Quarter the 8th. day, 36 minutes past 1 after noon

Full Moon the 16th. day, about 4 after noon.

Last Quarter the 24th. day, 27 min. past 1 in the morn.

New Moon the 30th. day, 34 minutes past 5 afternoon.

{ 1 day at 1 Afternoon, *Saturn*  
 1 day at 10 at Night, *Venus*  
 2 day at 1 Afternoon, *Mercury*  
 5 day at 10 at Night, *Jupiter*  
 25 day at Noon, *Mars*  
 29 day 4 in the Morning, *Saturn*  
 29 day at 10 Beforenoon, *Mercury*,  
 31 day at 10 at Night, *Venus*

is with the Moon.

*Jupiter* and *Venus* are Occidental and Evening Stars till; and *Mercury* to the 15 day; and then He becomes Oriental and a Morning Star; *Saturn* and *Mars* are now Oriental and Morning Stars.

**U**PON Wednesday the first day A Type of the Sun's of this Month in the Morning, eclipse, on the first day the Sun will be almost 10 digits eclipsed, in the 21 degree of *Taurus*; and will be visible here (if the Air prove Clear and Serene:) twill begin a little past 8 of the Clock in the Morning, the middle and greatest Obscuration thereof will be about 15 minutes after 9; and the end about half an hour after 10. The whole duration thereof will be about 2 hours and a quarter. *Mars* comes now from *Pisces* into *Aries*; *Venus* from *Taurus* into *Gemini*, and from thence

to *Cancer*; *Mercury* is Retrograde in *Gemini*, and goes back into *Taurus*, and then becomes direct in Motion. here is now a Conjunction of the Sun and *Saturn* in *Taurus*; and of the Sun and *Mercury* in *Gemini*; a Sextile of the Sun and *Jupiter*, in *Taurus* and *Cancer*; and *Saturn* and *Mars* in *Taurus* and *Pisces*; and Trine Aspect of *Jupiter* and *Mars*, in *Cancer* and *Pisces*. — A Month of much Business. — Revolutions and Mutations in some Countries and Cities in Europe seem to be approaching. —

Wet, Cold, Snowy, or Cloudy weather, at the beginning this Month, but afterwards better weather therein.

B

June

1706.

June hath xxx Days.

| 30 | f                                 | 18  | 32   | 5  | 40 | Sun sets 8. 10.                |

|     |   |                                         |   |                   |
|-----|---|-----------------------------------------|---|-------------------|
| The | { | 2 day at 4 Afternoon, <i>Jupiter</i>    | } | is with the Moon. |
|     |   | 23 day at 5 in the Morning, <i>Mars</i> |   |                   |
|     |   | 25 day at 6 Afternoon, <i>Saturn</i>    |   |                   |
|     |   | 28 at 6 in the Morning, <i>Mercury</i>  |   |                   |
|     |   | 30 day about Noon, <i>Jupiter</i>       |   |                   |
|     |   | 30 day at Midnight, <i>Venus</i>        |   |                   |

*Saturn, Mars, and Mercury* are *Oriental* and *Morning* Stars all this Month; and *Jupiter, and Venus* are *Occidental* and *Evening Stars*.

THE *Sun* comes into the *Solstitial Sign Cancer*, on the 11th of this Month, betimes in the Morning: and *Jupiter* and *Venus* now go from thence into *Leo*: *Mercury* towards the Month's end, removes from *Gemini* into *Cancer*, and *Saturn* from *Taurus* into *Gemini*. The *Mutual Aspects* of the Planets in this Month, are these, viz. A *Quartile* of *Mars* and *Venus* in *Aries* and *Cancer*; a *Sextile* of *Saturn* and *Venus* in *Taurus* and *Cancer*; of *Mars* and *Mercury* in *Aries* and *Gemini*; and a *Conjunction* of *Jupiter* and *Venus* in *Leo*.——If no Changes appeared in *France*, and in some other Countries beyond the Seas, in the Two last Months; it's probable, they may now draw nigh. Some great Men in *Europe* dye, or are in some Melancholly Postures. Martial undertakings. Divers Reports from some foreign Places about some weighty Transactions. The event of things uncertain. Some Peoples Affairs stand doubtfully. News from *Ireland, Poland*, and some Northern Countries, may be full of Troubles; or be much Unsettled.

Indifferent Seasonable Weather in this Month, for ought can discover.

1706.

July hath xxxi Days.

First Quarter, the 6 day, about 10 at Night.

Full Moon, the 14 day, 36 minutes past 3 Afternoon.

Last Quarter, the 21 day, 40 minutes past 11 Beforenoon.

New Moon, the 28 day, 33 minutes past 2 Afternoon.

{ 19 day at 2 in the Morning, *Mars*  
 { 19 day at Noon, *Saturn*.  
 { 25 day at 2 Morning, *Jupiter*  
 { 29 day at 8 Morning, *Mercury*  
 { 30 day at 2 Afternoon, *Venus* } is with the Moon.

*Saturn, Jupiter, and Mars* are *Oriental* and *Morning*  
*Stars* all this *Month*; *Venus, and Mercury* are *Occidental*  
*and Evening Stars*.

**M**ARS comes now from *Taurus* into *Gemini*; and  
*Venus* and *Mercury* leave *Virgo*, and come into  
*Libra*. The *Mutual Aspects* of the *Planets* in this *Month*,  
 are a *Trine* of *Mars* and *Mercury*, in *Taurus* and *Vir-*  
*go*; of *Saturn* and *Venus*, and *Saturn* and *Mercury*, in  
*Gemini* and *Libra*; a *Quartile* of the *Sun* and *Saturn* in  
*Gemini* and *Virgo*; and a *Sextile* of *Jupiter* and *Venus*  
 in *Leo* and *Libra*.——Some great People differ and  
 disagree. In the *South-west*, and *Western parts* of *Eu-*  
*rope*, some Things of Consequence may be now carried  
 on. Many Turnings and Windings in the Publick Affairs  
 of some Nations. Soldiers appear imploy'd; and are not  
 idle. Armies fight; rencounter each other: or are draw-  
 ing near to Action. Some places in *France* and *Foreign*  
 countries, under some considerable difficulties.——Some  
 of the *Effects* of the late *Solar Eclipse* in *May*, may be  
 now manifested in some places.——

Some *Storms* now and then in this *Month*, with some  
 claps of *Thunder*: yet, pretty good weather for the most  
 part, &c.

First Quarter, the 4 day, 20 minutes past 8 Morning.

Full Moon, the 11 day, 26 minutes past 10 Beforenoon.

Last Quarter, the 18 day near 2 in the Morning.

New Moon, the 25 day, 15 minutes past 8 at Night.

| 30  | Cold weather at hand              | 17  | 39 | 8  | 19 | Sun sets 5. 25.                |

The { 15 day at 7 at Night, *Saturn*  
 16 day at 4 in the Morning, *Mars*  
 21 day at 6 at Night, *Jupiter*  
 24 day at 11 before noon, *Mercury*  
 29 day at 9 at Night, *Venus* } is with the Moon.

*Saturn*, *Jupiter*, and *Mars* are *Oriental* and *Morning Stars* still; and *Venus* is *Occidental* and an *Evening Star*; and so is *Mercury* to the 15th day, and then *He* becomes *Oriental* and a *Morning Star*.

THIS Month begins with a *Conjunction* of *Saturn* and *Mars* in *Gemini*; *Saturn* being *Stationary*, and becomes then *Retrograde*. The *Sun* on the 12 day, about half an hour after 2 of the Clock in the Afternoon, comes into the *Equinoctial Sign Libra*; and *Venus* comes now from thence into *Scorpio*; and *Mercury* becomes *Retrograde* in *Libra*: and comes back from thence into *Virgo*: and there becomes *direct* in *Motion*. The *Sun* and *Mercury* are now in *Conjunction* in *Libra*; and there is now a *Trine* of *Mars* and *Mercury*, *Saturn* and *Mercury*, the *Sun* and *Saturn*, and the *Sun* and *Mars*, in *Gemini* and *Libra*; a *Quartile* of *Jupiter* and *Venus* in *Leo* and *Scorpio*; and a *Sextile* of *Venus* and *Mercury* in *Virgo* and *Scorpio*. — Sudden Casualties may disturb some *City* or *Cities*; and the sad *Effects* of *War* some *People*. Remarkable accidents. A sickly Season in divers places. *Flanders*, *Brabant*, and *Countries* and places under *Gemini* may be concerned by the *Conjunction* of *Saturn* and *Mars* now therein. —

Tempestuous Weather at the beginning of this Month; and windy and wet weather often therein.

First Quarter, the 3 day, 33 minutes past 11 at Night.

Full Moon, the 10 day, 24 minutes past 7 at Night.

Last Quarter, the 17 day, a little past 1 Afternoon.

New Moon, the 23 day, 39 minutes past 2 Afternoon.

The { 13 day at 2 in the Morning, *Saturn*  
 13 day at 4 Afternoon, *Mars*  
 19 day at 8 Morning, *Jupiter*  
 25 day at 4 Morning, *Mercury*  
 29 day at 9 at Night, *Venus* } is with the Moon.

*Saturn, Jupiter, Mars, and Mercury, are Oriental and Morning Stars all this Month; and Venus is still Occidental and an Evening Star.*

Type of the Moon's  ON Thursday the 10 day of this Month at Night, the Moon will be almost 8 digits Eclipsed, near unto the 28th degree of *Aries*: and will be visible here (if the Clouds hinder not) it will begin about a quarter of an hour past 6, the middle thereof, or greatest Obscuration, will be at 37 minutes past 7. and the end about 9 of the Clock at Night. The Total duration will be about 2 hours and an half. The Sun will be Eclipsed

on the 25 day about 3 in the Afternoon, but not to be seen here. There is in this Month an Opposition of *Saturn* and *Venus*, in *Gemini* and *Sagittary*, (at the very beginning thereof) a Trine Aspect of *Saturn* and *Mercury*, and *Mars* and *Mercury*, in *Gemini* and *Libra*; and of *Jupiter* and *Venus* in *Leo* and *Sagittary*; a Sextile of the Sun and *Jupiter*, in *Leo* and *Libra*; and of *Jupiter* and *Mercury*; and the like Aspect of *Venus* and *Mercury*, in *Libra* and *Sagittary*; and an Opposition of *Mars* and *Venus* in *Gemini* and *Sagittary*. *Mars* now becomes Retrograde in *Gemini*; *Venus* passes from *Sagittary* into *Capriorn*, and *Mercury* from *Libra* into *Scorpio*. — The effects of the above mentioned Lunar Eclipse, will e're operate in those Countries and places that are under *Aries*, wherein it happens. It has no propitious signification.

Cold, sleety, and wet Weather, in the first part of this Month: but about the middle and latter part better weather.

November

First Quarter, the 2 day, about 1 Afternoon.

Full Moon, the 9 day, a little past 5 in the Morning.

Last Quarter, the 16 day, 40 minutes past 4 Morning.

New Moon, the 24 day, 17 minutes past 9 Morning.

{ 9 day at 10 Beforenoon, *Saturn*  
 { 9 day at 4 Afternoon, *Mars*  
 { 15 day at 8 at Night, *Jupiter*  
 { 15 day at Noon, *Mercury*  
 { 8 day at 8 Morning, *Venus* } is with the Moon.

*Jupiter* is Oriental and a Morning Star still, and *Saturn* and *Mars* are so too, till about the middle of the Month, and then They becomes Occidental and Evening Stars. *Venus* and *Mercury* are Occidental and Evening Stars all this Month.

*Jupiter* now comes into *Virgo*; and *Saturn* and *Mars* by a Retrograde Motion, come back from *Gemini* into *Taurus* again, and come to Conjunction there. *Venus* removes from *Capricorn* into *Aquarius*; *Mercury* from *Scorpio* into *Sagittary*, and so into *Capricorn*. There is now Conjunction of the Sun and *Mercury* in *Scorpio*; a Quarrel Aspect of the Sun and *Jupiter*, in *Virgo* and *Sagittary*; and of *Saturn* and *Jupiter*, in *Gemini* and *Virgo*; an Opposition of the Sun and *Saturn*, and the Sun and *Mars*, in *Gemini* and *Sagittary*; and a Trine of *Mars* and *Venus*, and *Saturn* and *Venus* in *Taurus* and *Capricorn*; and of *Jupiter* and *Mercury*, in *Virgo* and *Capricorn*.—Great Windings, and much disagreement amongst the Stars now, by their Mutual Aspects. Their Portents and Significations very Considerable.—— Dissensions, Broils, and Disorders will Consequence amongst some People. Alterations, Epidemical Diseases, sudden Fires, and the Operations of War may appear in some places now, or e're long.——

Some Cold and Snowy Weather in this Month: High Winds, violent storms, and Thunder and Lightning, and unusual Weather in some places.——

December

1706, December hath xxxi Days.

First Quarter, the 1 day, about Midnight.

Full Moon, the 8 day, 47 minutes past 3 Afternoon.

Last Quarter, the 15 day, 45 minutes past 11 at Night.

New Moon the 24 day, 14 minutes past 3 in the Morning.

First Quarter, the 31 day, 12 minutes past 9 Morning.

| 30   | B  | Cold, windy, and                  | 19 | 41 | 8  | 6  | Sun rises 8. 10.               |
| 31   | a  | stormy weather now.               | 20 | 42 | 22 | 5  | Sun sets, 3. 51.               |

|   |    |                                     |   |                   |
|---|----|-------------------------------------|---|-------------------|
| { | He | 6 day at Noon, <i>Mars</i>          | } | is with the Moon. |
|   |    | 6 day at 5 at Night, <i>Saturn</i>  |   |                   |
|   |    | 13 day at 6 Morning, <i>Jupiter</i> |   |                   |
|   |    | 25 day at 1 Morning, <i>Mercury</i> |   |                   |
|   |    | 26 day at 5 at Night, <i>Venus</i>  |   |                   |

*Jupiter* continues still *Oriental* and a *Morning Star*; *Saturn*, *Mars*, and *Venus* are *Occidental* and *Evening Stars*; and so is *Mercury* to the 26 day; and then *He* becomes *Oriental* and a *Morning Star*.

NOW *Jupiter* becomes *Retrograde* in *Virgo*, and *Mars*, direct in *Motion* in *Taurus*. *Mercury* becomes *Retrograde* in *Capricorn* and *Venus* in *Aquarius*. There are now but two *Celestial Aspects*, viz. a *Trine* of the *Sun* and *Jupiter*, in *Virgo* and *Capricorn*, and of *Mars* and *Mercury* in *Taurus* and *Capricorn*; and there will be a *Conjunction* of the *Sun* and *Mercury* in *Capricorn*, at the very latter end of the *Month*.——The effects of the late Eminent configurations of *Heaven* in *November* past may be manifested now, or at the beginning of next Year, 1707, in many places of *Europe*: they were of a turbulent, and unkind disposition. Some Nations in *Europe* out of order, and their Affairs in uneasie, and ill Circumstances. Mutations, Calamities, and great Actions, and Designs seem to be approaching in divers parts of the World; if no Comet, unusual *Meteors* or *Prodigies* in the *Air* appeared in the two last Months, they may be expected now, &c.—The *Weather* may be pretty moderate the most part of this *Month*; and seasonable for the time of the *Year*.

# Astral Observations and Predictions, for the Year, 1706.

By William Anderton, Student in *Astrology*.

—————*Sed regit Astra Deus.*

lift up your eyes to the Heavens, and look upon the Earth beneath: for the Heavens shall vanish away like smoke, and the Earth shall wax old like a garment, and they that dwell therein shall die in the manner. — *Isaiah the 51. 6.*

ye therefore ready also: for the Son of Man cometh at an hour when ye think not. *S. Luke 12. 40.*

ke ye heed, watch and pray, for ye know not when the time is: Lest coming suddenly he find you sleeping; and what I say unto you, I say unto all, Watch. *S. Mark 13. 33, 36.*

**I**S the opinion of some very Learned and Sober Persons, as well Divines as others; That the World is in the very last part of its last Age; and draws near (as conceived) to its Dissolution. That it had a Beginning, I verily believe, and also that it shall have an End, when Almighty God shall think fit: And seeing that the Sacred Scriptures tell us, That when ever the End thereof comes, 'twill suddenly and unexpected; therefore it behoves us all not to be too much unmindful thereof, lest it should surprize us unawares; as as the terrible and amazing Stormy Wind and Pest did November the 27th 1703. which hath been much noticed, and very little regarded by some; and seems now much seriously considered by many.

The Anonymous Author of that Small Piece Intituled, *The Last Tribunal; Or, The day of Judgment demonstrated*, Page 19th, writes thus, — “The Scripture compareth the day of Judgment to a Thief coming in the night, and to a Snare for the Bird; it will come upon all unexpected and unlooked for. It is true, many sober Divines, tho’ they say the time cannot exactly be determined, yet think it is not far off: yea, they look for mighty Alterations in the World; so that they think it not improbable, that

*Astral Observations, 1706.*

“ some now living may not die till these things be; but  
“ these seem only Conjectures. Let us content our selves  
“ with this, That it is certain, and the time uncertain; that  
“ we should not have Oyl to provide for, when the Bride  
“ groom is come; that we should not cry out with him  
“ — Let me alone longer, I am not ready for that day.  
*Thus He.*

The Learned Mr. Ray in his *Discourse of the Dissolution of the World*, in his Book Intituled, *Three Physico-Theological Discourses* Page 366, 367, writes thus. — “ The Dissolution of the  
“ World concerns us, because it’s possible it may happen  
“ our times; It may surprize us before we are aware. The  
“ precise time thereof is uncertain. And it shall be sudden  
“ and unexpected, coming as a Thief in the night. — There-  
“ fore we ought always to be upon our guard, to have our  
“ loins girt about, and our lights burning. This use the Scrip-  
“ ture in many places makes of the uncertainty of the time  
“ of Christ’s Coming, see *S. Luke* the 12. 40. and the 21. 34.  
“ 35. parallel whereto are *S. Matthew* 24. 42. and *S. Mark* 13.  
“ 33. 35. That it shall come is certain, when it shall come  
“ uncertain; and if every day draws nearer and nearer, there-  
“ fore it is not wisdom to remove the evil day far from us: as  
“ as in reference to the day of death, it is an usual and prudent  
“ Advice, so to live every day, as if it were our last day; or  
“ least as we would not to be afraid to do, should it be so  
“ because we are sure that one day will be our last, and there-  
“ ought we know, the present may be it; so likewise for  
“ rational Counsel, in respect of the End of the World, to  
“ to prepare our selves for it by a Holy Conversation, that  
“ we may get above the terror and dread which will otherwise  
“ wise attend the apprehension of the approach of it: and that  
“ we may be provided against the worst that may follow, and  
“ be secure come what can come. *Thus this Learned Man.*

I proceed now (with God’s assistance) to discourse of the  
Sun’s Ingress into Capricorn, in December 1705, and Winter  
Quarter of this Year.

THE Winter Quarter of every Year, always begins (ac-  
cording to the Astronomical Account) when the Sun en-  
ters at Capricorn; being now on Monday the Tenth day of  
December 1705, about 51 Minutes past ten of the Clock.

*Astral Observations, 1706.*

Night; the 18th Degree of *Virgo* being the then Ascendent in our *Horizon*, and the 14th Degree of *Gemini*, the Cusps of the *Medium Cœli*: the Sun being then in that part of *Heaven*, which by *Astrologers* is called the Fourth House, and the other Planets thus posited, viz. *Saturn* in the 21st Degree of *Taurus* Retrograde; and *Caput Draconis* in the 21st Degree, both in the 9th House: *Jupiter* in the 11th House, in the 27th Degree of *Cancer* Retrograde: *Mars* in the First Degree of *Sagitary*, and *Venus* in the Second, in Conjunction in the Third House: *Mercury* in the 4th House, in the 10th Degree of *Capricorn*: The Moon in the 7th, in the 10th Degree of *Pisces*: and *Cauda Draconis* in the Third, in the 21st Degree of *Scorpio*.

This Ingress of the Sun is not attended with any Malevolent or very considerable Configurations of Heaven; there appearing only a Conjunction of *Mars* and *Venus* (as I said before) in *Sagitary*; and a Trine Aspect of *Saturn* and *Mercury*, in *Taurus* and *Capricorn*. Some days after there is an Opposition of *Jupiter* and *Mercury*, in *Cancer* and *Capricorn*; and a Trine Aspect of the Sun and *Saturn*, in *Taurus* and *Capricorn*: As to the Lunar Aspects at this Ingress, the Moon is in a hostile Aspect of *Saturn* only; and from thence applies next to a Trine of *Jupiter*. From hence it appears that the Effects of the Stars at this Ingress of the Sun, seem to be of no very Material importance as unto Mundane Affairs: tho' some Nations and People in some parts of the World, may carry on the very considerable Martial Designs in the Winter Quarter of this Year, and Months of *January* and *February* therein. It is to be observed, That about a Month before this Solar Ingress, viz. on the 16th day of *November* preceding the same, there was an Opposition of *Saturn* and *Mars* in *Taurus* and *Scorpio*, two fixed Signs; whose Effects it's probable may be manifested in this Winter Quarter, and Months aforesaid, in the Countreys and Places of the World, that are under those Signs; and may be of some uneasy and unpleasant Consequence: the more, because *Saturn* was Retrograde at the said Opposition. *Poland*, *Switzerland*, *Lorrain*, some Considerable parts in *Italy*, the North part of *Bavaria*, *Norway*, and some other places, &c. are under the aforesaid Sign (as *Astrologers* say) and may be therefore sensible in one kind or other

Astral Observations, 1706.

of the Portents of the said *Opposition*; and if Ireland be quitted therefrom, it will be well.

I do proceed, and say, That the very *Beginning* of the Year, there is an *Opposition* of the Sun and *Jupiter*; and in *February* the like Aspect of *Jupiter* and *Mars*, in *Cancer* and *Capricorn*; which being considered with the aforesaid *Opposition* of *Jupiter* and *Mercury* there too, quickly after this *Ingress* do seem to import Controversies and Debates, to happen this *Winter Quarter*, and *Months* aforesaid, in some *European* places, about Religious Matters; and some Animosities and unkind Disputes, &c. amongst some People. National Differences also, and Military Proceedings in sundry parts of *Europe*; and that the publick Negotiations and Concerns of some Countries, Cities, &c. beyond the Seas, will be under some great Difficulties, and in some uncertain and inconvenient Circumstances; and many various Reports may be abroad about the publick Transactions and Designs of some Considerable Countries and Places beyond the Seas, in the *Winter Quarter* of this Year, and *Months* aforesaid: And because *Cancer* is by *Astrologers* accounted to be a *Northern Sign*, and *Capricorn* a *Southern*; therefore it is very probable that the Effects of the aforesaid *Opposition* will appear in some Countries and Places, that are in those Parts of the World, where some of them are very remote, and some not so, &c. — And seeing that *Jupiter* is much concerned in the said *Oppositions*, their Effects may in some respect or other, concern *Spain*, *Portugal*, *Hungary*, *Dalmatia*, &c. as well as those Places that are under *Cancer* and *Capricorn*, the aforesaid Signs wherein the said *Oppositions* happen; and there may be some Confusions of very great Concernment in agitation, in the *Winter Quarter* of this Year and *Months* aforesaid in the *North* — also in the *Northeast*, &c. and *South* and *Southwest* parts of the World from *England*: and also upon some Seas some Actions of Consequence may appear, and now and then boisterous Weather, and *Piratical* doings. — As to the Weather this Quarter, 'twill be often Cold, Windy, and unsettled in *January* and *February*: and Snow may be then sometimes expected, and Wet, Sleaky, *Winter-weather*; there may be then some Claps of Thunder too, in some places. And I come now in the next place, to consider of the *Ingress* of

*Astral Observations, 1706.*

into *Aries* this Year 1706. and Spring Quarter thereof. Upon Sunday the 10th day of March this Year, about 6 Minutes before one of the Clock in the Morning, the Sun makes Entrance into *Aries*; at which time the 13 Degree of *Sagittarius* is in the *Ascendant* in our Horizon; and the 5th Degree of *Libra*, is on the *Cusps* of the *Medium Cœli*: the Sun Ingressing then in the Third House; *Saturn* in the 15th in the 10th Degree of *Taurus*, within less than a Degree of *Caput Draconis*. *Jupiter* in the 19th Degree of *Cancer* in the Eighth House: *Mars* in the Second, in the 6th Degree of *Aquarius*: *Mercury* in the 15th Degree of *Pisces*; and *Venus* in the 23d, in the Third House. The Moon is in the Seventh, in the 25th Degree of *Gemini*: and *Cauda Draconis* is in the 17th Degree of *Scorpio*, in the Eleventh House.

At this *Vernal Ingress*, all the Planets (If the time thereof exact) but *Jupiter* and the Moon, are under the Earth; as the Publick Affairs, and Negotiations of divers Countries and Places in the World, would be somewhat obscurely and indistinctly managed in the Spring Quarter of this Year. As the Mutual Aspects of the Planets attending this Ingress, they are only a *Sextile* of *Saturn*, and *Mercury* in *Pisces* and *Mars*: and in a *Trine* of *Jupiter* and *Mercury* in *Pisces* and *Cancer*; which seem to have moderate Significations. And as the Moon's Aspects with the Planets, she is not concerned during her abode in *Gemini* (wherein she is posited at this Revolution of the Sun) but is void of Course: yet she may be admitted to be in a *Platick Quadrature* of the Sun, and in her first *Trine* Aspect, which she makes after her Coming into *Cancer*. However, in March this Year, some time after the said Ingress, there is a *Conjunction* of *Venus* and *Mercury*; and the Moon and *Mercury* in *Aries*: and there happens then also these Mutual Aspects of the Planets, viz. A *Quadrature* of *Saturn* and *Mars*, in *Taurus* and *Aquarius*: of *Jupiter* and *Mercury*, the Moon and *Jupiter*, and *Jupiter* and *Venus*, in *Aries* and *Cancer*: indeed *Saturn* and *Mars* are near unto a *Platick Quartile* Aspect, at the time of the Sun's Ingress. And these Configurations of Heaven now mentioned, seem to have some various Significations, as unto some Mundane Concerns, in the Spring Quarter of this Year, and Months of March, April and May therein: And they do seem to portend many Turnings and

Windings, Difficulties and uncertain Proceedings to happen in the Publick Affairs, and Negotiations of divers Countries and Cities in *Europe*; and that War will be still carried on by some Nations and People, both at Sea and Land, notwithstanding the Inclinations of some unto Peace, and the Endeavours to procure it accordingly. — Also Differences and unkind Debates, may arise in the *Spring Quarter* of the Year and Months aforesaid; between some Nations and People formerly or not long since in Friendship and Amity, and some unfriendly passages may appear betwixt them; and Uneasiness amongst some People of different Perswasions in Religion; and Troubles may happen in some Places of *Europe* thereby, and about Religious Matters. And there may also some Actions of Consequence at Sea, and in some Regions and Places in the North, Northeast, and Eastern part of the World, &c. and much News may come from them of Importance. Some People may be also in some quiet and irregular Postures, who were some time heretofore in union with their Neighbours, and held good Correspondence with them.

I do further proceed also, and say, That there will be Two *Eclipses* in this *Vernal Quarter*, visible in our Horizon viz. One of the *Moon*, and the other of the *Sun*: that of the *Moon* will be but a small *Eclipse*, for the *Moon's* Body will not be half darkned; it will happen on *Wednesday* the 17th day of *April*, about One of the Clock in the Morning, in the 7th Degree of *Scorpio*. That of the *Sun* will be on *Wednesday* the first day of *May*, about 9 of the Clock in the Morning, in the 21st Degree of *Taurus*; and will be a very great *Eclipse*, for the *Sun's* Body will be wholly darkned, with 2 Digits, or thereabouts. As to these *Eclipses*, you have the Types, and a particular and full Account of them in my *Observations* on the Months wherein they happen, unto which I refer you.

*Eclipses* of the *Sun* and *Moon*, have been always thought many worthy of *Observation*; and to be taken notice of, whereas ever some have thought to the contrary. Sir *Thomas Browne* in his *Religio Medici*, Page the 30th, of the 7th Edition, writes thus: — “ In the Causes Nature and Affections of the  
“ *Eclipses* of the *Sun* and *Moon*, there is most excellent Speculation

# Astral Observations, 1706.

culatation, but to profound further, and to contemplate a Reason why the Providence of G O D hath disposed and ordered their Motions In that vast Circle, as to conjoin and obscure each other, Is a Sweeter piece of Reason, and a Diviner point of Philosophy. Thus He.

The aforesaid Lunar Eclipse being but small, I shall not insist much upon its Effects: But as to the Sun's, it being so Great and Considerable; the Effects thereof cannot be expected to be accordingly.

At the Middle time of this Eclipse, and greatest Obscuration of the Sun; the Second Degree of Leo is the Ascendant of our Horizon; and the 8th Degree of Aries is on the Cusp of the Medium Caeli: the Sun and Moon are very near to Saturn, in the Eleventh House of Heaven; he being therein or about, the 23d Degree of Taurus, and they in the 21st Degree. Venus, Mercury and Jupiter, are in that House too: Venus being in the 28th Degree of Taurus, Mercury in the 8th Degree

## Astral Observations, 1706.

Degree of Gemini Retrograde; and Jupiter in the 24th Degree of Cancer. Mars is in the 15th Degree of Pisces, in 9th House; Caput Draconis in the 10th in the 14th Degree of Taurus, and Cauda Draconis in the 4th, in the same Degree of Scorpio. All the Planets but Mars, being at the aforetime of the Sun's greatest Obscuration, in that part of Heaven which we call the Eleventh House; wherein the Eclipse happens, do seem to have very much signification unto the Matters and Things in the World signified by that House and part of Heaven.

*Ex Eclipsibus magni effectus proveniunt, Great Effects exceed Eclipses, says Dasipodius Aphor. 58. and the Great Eclipses have the Greatest Effects, and do most effectually operate: and seeing that at this Eclipse, the Sun and Moon in Conjunction with Saturn; the Effects thereof thereby, will be very much disliked; as seeming to be of no kind importance unto those Countries and Places, unto which the Eclipse hath Relation: and those Parts of the World that are under Taurus, the Celestial Sign wherein it happens, may in one kind or other very much concerned thereby. Eclipses of the Luminarium maxime agunt in illas regiones quae sunt sub signis Ecliptico: For Astrologers say, That the Effects of Eclipses do operate most in those Regions and Places, under the Signs of Heaven, wherein the Eclipse happens. And Masabius an Ancient and Learned Astrologian, treating of Eclipses writes thus: — Scito quod in Eclipsi Solis non potest fore quin significetur aliquod magnum accidens secundum quantitatem ipsius Eclipsis. Junctinus saith, That when an Eclipse of either of the Luminaries, shall happen to be in the earthly Triplex which consists of these Signs, viz. Taurus, Virgo and Capricorn; that then Scarcity of Corn, and the Fruits of the Earth are portended by such an Eclipse: And also Proclus saith That an Eclipse of the Sun, in the latter part, of Taurus (now) signifies a Famine to happen in some Countries and Places concerned by the Eclipse; and there may be also some great Decay, or an unusual Mortality of the greater sort of Cattle, as Cows, Oxen, &c. during the Continuance of the Eclipse's Effects.*

Satler, treating of Eclipses, Page 74, writes thus: — *Consequenter habebimus, tumultus, seditiones, pestes, famem, grandem*

*inundationes, calamitatem denique præsertim Solarem por-*  
disse, We have found by experience, that Tumults, Se-  
ditions, Plagues, Famines, Storms of Hail, Inundations, and  
Famines in several kinds, are usually portended by an E-  
clipse of the Sun; the more great and considerable, by how  
much the Eclipse is great. And seeing that the Sun and Moon  
in this Eclipse very much afflicted by Saturn, by his be-  
ing so near unto them, the Effects thereof deserves the  
more to be considered, as being of the greater Concern-  
ment.

This Eclipse doth seem to portend sundry Mutations and  
Revolutions, to happen in the World; and strange and sud-  
den Alienations of Friendship, Breach of Leagues, Amities  
and Friendships: and some Nations and People may be in  
the Uneasy and Melancholly Circumstances occasioned  
thereby: from thence Quarrels and Controversies may arise,  
and angry Proceedings and Transactions; also it may be  
foretold, that some Earthquakes, Scarcity of Provisions, and  
very unseasonable Weather may sometimes appear in some  
Parts of the World (and malignant Diseases, if not the  
subtle Plague) during the Continuance of this Eclipse's Effects,  
which will be about two Years from the day of the Eclipse's  
appearance. Poland, the Muscovite's Territories, and those  
Counties and Places under Taurus, which were herein be-  
fore mentioned by me in the Winter Quarter of this Year  
where I have spoken about the Opposition of Saturn and  
Jupiter in Taurus and Scorpio: and some other foreign  
Counties besides, far remote, may be much concerned in  
this Eclipse's Effects. Ireland is under Taurus, as Astrologers

As concerning the Weather in the Spring Quarter of this  
Year, and Months of March, April and May therein, it will  
be sometimes very uncertain, and not very seasonable: to-  
wards the latter end of March many great and immoderate  
Showers of Hail and Rain, with Thunder, &c. in some places  
will appear; and in April too, there will be now and then  
many cold Showers, and various Weather; especially to-  
wards the latter end thereof, and at the very beginning of  
May, &c. such like Weather also, viz. Cold, Cloudy, Misty,  
Stormy, or very wet Weather, which may hinder the full  
and

*Astral Observations, 1706.*

and clear appearance of the *Eclipse* of the *Sun* unto us. so I now come to the *Ingress* of the *Sun* into *Cancer*, and the *Summer Quarter* of this *Year*; being the next thing in order to be considered herein.

On *Tuesday* the *Eleventh* day of *June* this *Year*, about *Minutes* past one of the *Clock* in the *Morning*, the *Sun* comes into the *Solstitial Sign Cancer*; at which time the *12th* Degree of *Taurus* ascends in our *Horizon*; and the *18th* Degree of *Capricorn* is on the *Cusps* of the *Medium Caeli*: *Saturn* at *Caput Draconis* being in the *Ascendant*, the one in the *12th* Degree of *Taurus*, the other, *viz.* *Saturn* in the *28th* Degree of *Capricorn*; *Mercury* is in the *Ascendant* also in the *8th* Degree of *Gemini*; *Jupiter* is in the *Fifth House*, in the *first* Degree of *Leo*; *Mars* in the *12th* in the *15th* Degree of *Aries*: the *Sun* is in the *Third House*: *Venus* in the *Fourth*, in the *18th* Degree of *Cancer*: The *Moon* is with *Cauda Draconis*, in the *Seventh House*, in the *12th* Degree of *Scorpio*: Her last Separation from her Aspects with the Planets, being from a *Quartile* with *Jupiter*; and at the *Ingress* she is applying to a *Trine* of *Venus*, and from thence to an *Opposition* of *Saturn*.

The Appearance of the Planet *Saturn*, at this *Ingress* of the *Sun* into *Cancer* (if the time thereof be exact) in the *Ascendant* seems to be of no good Signification unto the Common People of some Nations (in the *Summer Quarter* of this *Year* and Matters and Things signified by that part of *Heaven* and in regard that *Taurus* is the Sign *Ascending* at this *Solstitial Ingress*, wherein the late *Great Solar Eclipse* in *May* was: some of the Effects of the said *Eclipse* may be expected to appear in some Places, in the *Summer Quarter* of this *Year* and *Months* of *June*, *July* and *August* therein. However this *Solar Ingress* is not attended with any *Violent* or *Mischievous* Configurations of *Heaven*; the Planets in their Courses pass on in *June* after the *Ingress*, very serenely and mildly, as unto their *Mutual Aspects*: In *July* some of them are somewhat busily disposed, and some *Quadrant* Aspects happen amongst them; and three *Conjunctions*, *viz.* of the *Sun* and *Mercury* in *Cancer*; and of *Jupiter* and *Mercury*, and of the *Sun* and *Jupiter* in *Leo*: but their Effects do not seem to be of very great Importance: Yet, by the Positions of some of the Stars, at the aforesaid *Solar Eclipse*, and also at this

## *Astral Observations, 1706.*

; there seems signified some eminent Transactions to  
open at Sea and Land, in the *Summer Quarter* of this Year,  
wherein some *European Nations* may be much concerned.  
The said Eclipse, and *Saturn* then, were not very far  
from the *Pleiades*; accounted by *Astrologers* a turbulent Con-  
junction: besides, the *Moon* at this said Ingress, is in that  
Part of Heaven which we call the *Seventh House*; which is  
by *Astrologers* said to be of a Martial and unquiet Disposition  
of Signification. She, viz. the *Moon*, being in Opposition  
to the very Degree Ascending; and is also hastning to an  
Opposition of *Saturn*, now posited in the Ascendant: which  
may seem to be of some uneasy and unpleasant Importance,  
of Signification unto some People in the *Summer Quarter*  
of this Year: and some contagious Distempers may afflict  
many; and Enmities, Contentions, Quarrels, and Mar-  
tial Actions of Consequence, may happen therein in some  
Places; and Inconveniences and Difficulties in the Publick  
Affairs of some Nations in Europe. —

As to the *Weather* in this *Summer Quarter*, in *June* there  
may be now and then some Showers, with some Claps of  
Thunder in some places: In *July* the *Weather* may be very  
much unsettled, and many violent Storms of *Hail* and *Rain*,  
with much *Thunder*, &c. will often appear therein in di-  
verse places: but in *August* it will be more moderate, though  
the hasty Storms with some *Thunder*, may sometimes  
open therein. And so I come now in the last place, to  
consider of the Ingress of the *Sun* into *Libra*, and *Autumnal*  
Quarter of this Year.

Upon *Thursday* the 12th day of *September* this Year, about  
Minutes past two of the Clock in the Afternoon; the *Sun*  
enters at the *Aequinoctial Sign Libra*, and the *Autumnal*  
Quarter doth begin; at which time the Third Degree of *Ca-*  
*ncor* is in the Ascendant in our Horizon; and the 9th Degr.  
of *Scorpio* is on the Cusps of the *Medium Cœli*: *Saturn* being  
in the Fifth House of Heaven, in almost the Fourth Degree  
of *Gemini* Retrograde: *Mars* is in the Sixth House, in the  
Eighth Degree of the same Sign, separating from the Con-  
junction of *Saturn*. *Jupiter* is in the Eighth House, in the  
First Degree of *Leo*: The *Sun* is also in that House; *Venus* is  
in the 10th Degree of *Scorpio*, in the Tenth House, not far  
from

*Astral Observations, 1706.*

from *Cauda Draconis*, who is there in the Seventh Degree of *Mercury* is in the Ninth House, in the Fifth Degree of *Aries* Retrograde. The *Moon* is in the Third House, in the First Degree of *Aries*: and *Caput Draconis* is in the Fourth, in the Seventh Degree of *Taurus*. The *Moon* is applying to a Trine Aspect of *Jupiter*; and at this Ingress, there is the like Aspect of *Saturn* and *Mercury*, and the *Sun* and *Mercury* are going to Conjunction.

In this *Autumnal Quarter*, there is some great doing amongst the *Cœlestial Bodies*; whose Effects may be of very eminent Concernment unto several parts of the World. For sometime before this Ingress of the *Sun*, viz. on the First day of *September*; there is a Conjunction of *Saturn* and *Mars*, in almost the Fourth Degree of *Gemini*: *Saturn* being then Retrograde: and *Mars* about the sixth day of *October* becomes Retrograde too, in almost the Twelfth Degree of the same Sign: and on the 21st day of *November*, *Saturn* and *Mars* come again by their Retrograde Motion, to another Conjunction in the 29th Degree of *Taurus*, which is very much to be disliked, as seeming to have no good Signification. Besides, in *November* there is a great Concurrence of Aspects of the Planets, somewhat more than ordinary; for a Conjunction of Consequence amongst the Superior Planets happens altogether, viz. a Quartile of the *Sun* and *Jupiter*, in the very beginning of *Virgo* and *Sagitary*; and of *Saturn* and *Jupiter*, in the beginning of *Gemini* and *Virgo*: and an Opposition of the *Sun* and *Saturn*, and the *Sun* and *Mars*, in the beginning of *Gemini* and *Sagitary*. Such a Croud of Considerable Aspects together, cannot but have some important Significations: and according to the Judgment of some ancient *Astrologers*, some Revolutions, Mutations, Troubles, unquiet Actions and Proceedings, sudden Famine and Pestilential Diseases, may be expected to succeed in some parts of the World, that are under the said Conjunctions wherein they happen: but seeing they happen late in the Year, it seems to me as if their Effects would operate much, till the beginning of the next Year, 1707. For, *Corpora Cœlestia non agunt in instanti, sed cum tempore*. The *Cœlestial Bodies* do not act in an instant, and not all on a sudden; but sometimes at length, and with some

## *Astral Observations, 1706.*

Yet it may be some of the Effects of these Configurations, may appear even in the latter part of *November* (the month wherein they happen) and in *December* following. Besides in this *Autumnal Quarter*, viz. on the 10th day of *October*, between seven and eight of the Clock at night, there will be a visible *Eclipse* of the *Moon*, in the Eleventh Degree of *Heaven*, in almost the 28th Degree of *Aries*, (as you may see in my Observations on that Month) and being that almost the third part of her Body will be then eclipsed; its Effects may be somewhat considerable: the reason, because *Mars*, who is then Retrograde in the Twelfth Degree of *Heaven*, governs the Sign wherein the *Eclipse* is. Both seem to portend Treachery, Deceit, or some other Inconveniences to happen in some Military Concernments: some Uneasiness unto some Martial Persons in some places in the Months of *November* and *December* this Year: and some Loss and Decay of Sheep, and the smaller sort of Cattle, if not of the greater sort too, as Cows, Horses, &c. As touching the Weather in this *Autumnal Quarter*, at or about the middle of *September*, in some places there will be high Winds: in *October*, some cold Storms will now and then appear; and in *November* there may be much Snow, very cold and various Weather; and some Thunder also in some places, if not high and destructive Winds, &c. And some Comet, and some unusual Meteors, Sights, or Apparitions in the Air, may in this *Autumnal Quarter*, appear in some parts of the World.—— God grant that no violent Earthquake happen in the World in this Year.—— I shall now conclude with the words of *Job*, (*Job* 34. 29.) When God hideth his face, who then can make trouble? and when he hide his face, who then can behold him? whether it be done against Nation, or against a man only.——

May all the Blessings of Almighty God attend our most Gracious Sovereign Queen *ANN* now and evermore: and let us pray that *ENGLAND* may prosper, and be successful: that the Judgments of Almighty GOD may be averted,

*William Andrews.*
